Guide for protesters - Molotov cocktail No-No's

Categories : [Uncategorized](#)

Tagged as : [protester](#), [service deliverytips](#)

Dear protesters/recreational rioters

As protest season approaches I thought it would be good to give you some tips on how to stay alive, even through a violent protest.

1. Tip #1: When using a Molotov cocktail (a.k.a. a "petrol bomb"): There is an **incorrect** way to light it. Do **not** place the glass bottle full of petrol between your thighs, use one hand to light the cloth, and use the other hand to answer a phone call.

Best of luck.
